

The State and the Local Economy

This collection of papers, based on the work of CDPs across the country, looks at different aspects of the industrial decline evident in older urban areas, showing that these are not exceptional problems but integral to the transformation of Britain's industrial structure. They look critically at the role of government in these processes and at the implications for the labour movement facing job losses and the growth of low wage employment.

THE STATE AND THE LOCAL ECONOMY

The Managing Director who knew how to save his company over £300,000 re-location costs!
